

# Head Shoulders Knees And Toes - Ofenbach (♩ = )

Em G D C

I feel it in my head, my shoulders, knees and toes, My bones  
Your music gets me through the highs and lows  
My head, shoulders, knees and toes, My bones  
You're keeping me from feeling all alone

I've been praying to a thousand different stars  
To a thousand different arms 'til I found you  
I've been chasing 'bout a thousand different hearts  
For a thousand million hours, now I've found you

My nights will never be the same, the same again  
I've got you running through my veins

I feel it in my head, my shoulders, knees and toes  
My bones  
Your music gets me through the highs and lows  
My head, my shoulders, knees and toes  
My bones  
You're keeping me from feeling all alone, oh-oh-oh  
You're keeping me from feeling all alone  
You're keeping me from feeling all alone

Let me breathe you, take you down into my lungs  
While we're dancing to the song, now that I've found you  
You're a part of me, now I can't let you go  
You're the heartbeat in my soul, now that I've found you

My nights will never be the same, the same again  
I've got you running through my veins

I feel it in my head, my shoulders, knees and toes, My bones  
Your music gets me through the highs and lows  
My head, my shoulders, knees and toes, My bones  
You're keeping me from feeling all alone, oh-oh-oh  
You're keeping me from feeling all alone  
You're keeping me from feeling all alone
